Question 1

What was the hardest part of the assignment for you?

The assignment wasn't tough or had any hard part, any difficulty was a great review and quick refresher of python concepts.

Question 2

What was the easiest part of the assignment for you?

Installing python on the system was the easiest part of the assignment.

Question 3

What problem(s) helped further your understanding of the course material?

The translation from words to python code after not using python for several months was challenging. However, it was a great brush up exercise for python programming.

Question 4

Did you feel any problems were tedious and not helpful to your understanding of the material?

No, the problems were aligned with the concepts in the tutorial.

Question 5

What other feedback do you have about this homework?

The homework was a quick way to start with python programming and would like to have such tutorial exercise(can be optional/mandatory) for other python concept that would be helpful with the future assignments and coursework.
